PROFESSIONAL SUMMARY

Technical Manager and Architect with 10 years across BFSI, fintech, telecom and enterprise environments. I own technical delivery end to end — architecture decisions and HLD/LLD through deployment, security sign-off and production — and have led cross-functional teams of up to 18 across development, QA, DevOps and security.

Six years hands-on with AWS: three full environment migrations owned end to end, availability lifted from 82% to 99%, infrastructure cost reduced, and CI/CD pipelines that cut deployment time by 40%. Working across EC2, Lambda, ECS/EKS, RDS, VPC, CloudFront, IAM, KMS and CloudWatch, plus Azure AKS, VNets and NSGs.

Alongside delivery, I lead security and compliance programmes — VAPT remediation and closure, SAST/DAST/SCA governance, secure SDLC, and ISO 27001 and RBI-aligned controls for banking environments. More recently, applied AI work covering LLM API integration (Azure OpenAI, AWS AI services, Claude, Gemini), prompt guardrails, PII masking and AI security controls.

SELECTED CAREER HIGHLIGHTS

- Migrated three company environments to AWS end to end, lifting infrastructure availability from 82% to 99% while reducing cost
- Built Jenkins and Docker CI/CD pipelines that cut deployment time by 40%
- Optimised MySQL workloads across 40M+ rows, bringing reporting from minutes to seconds
- Led cross-functional teams of up to 18 across development, QA, DevOps and security
- Led security and compliance programmes to ISO 27001 and RBI-aligned standards in banking environments
- Best Employee of the Year 2022; promoted from Senior Developer to Technical Lead at Calibehr

CORE SKILLS

Architecture & Cloud: Solution Architecture, System Design, HLD/LLD, Multi-tier & Microservices Architecture, Cloud Migration, High Availability, BCP/DR, RPO/RTO, Cost Optimisation, Performance & Scalability

AWS & Azure: EC2, Lambda, ECS, RDS, S3, VPC, Security Groups, VPN, CloudFront, Route 53, ALB/ELB, API Gateway, IAM, KMS, Secrets Manager, CloudWatch, SNS | Azure SQL, VNets, NSGs, Azure Monitor

Security & Compliance Governance: VAPT Remediation & Closure, SAST/DAST/SCA Governance, Secure SDLC, SonarQube, OAuth 2.0, SAML, LDAP, MFA, RBAC, SSL/TLS & PKI, ISO 27001, CERT-In, RBI-aligned Controls, Audit Evidence & Sign-off

Observability: ELK Stack (setup & administration), QRadar SIEM Log Forwarding, CloudWatch, Azure Monitor, SNS Alerting, RCA

Delivery & Engineering Leadership: Team Leadership (up to 18), Product Ownership, RAID/RAG, CAB/RFC, Release & Change Management, Go-Live & Hypercare, Agile/Scrum, Budgeting, Resource Planning, Vendor Management

Applied AI: LLM API Integration, Azure OpenAI, AWS AI Services, Prompt Engineering, Prompt Guardrails, PII Masking, AI Security Audit, ML Prediction Model, Agentic Workflows, AI-assisted Development (Claude Code, Gemini)

Technologies: PHP, Laravel, Python, Go, JavaScript, Angular, MySQL, Docker, Jenkins, Git/Bitbucket, Linux, Nginx, Apache

WORK EXPERIENCE

Technical Manager | SmartConnect Technologies Pvt Ltd, Mumbai | Sept 2025 – Aug 2026

Owned architecture and technical delivery for enterprise telecom applications, leading development, QA, DevOps, infrastructure and cybersecurity teams alongside vendors and client stakeholders.

- Owned solution architecture, HLD/LLD, technology decisions and design approvals, with engineering governance across scalability and security reviews.
- Drove architecture decisions for high-availability environments across AWS and Azure, and managed the DevOps team running AKS-based container deployments, CI/CD, API gateways and networking.
- Led cybersecurity workstreams: VAPT remediation tracking and closure, SAST/DAST/SCA scanning cycles, SonarQube quality gates, secure SDLC, patch governance, CERT-In coordination, InfoSec audit evidence and security sign-off.
- Led enterprise authentication and application-security integrations using OAuth 2.0, SAML, LDAP, MFA, JWT, RBAC, PKI, SSL/TLS and key management.
- Administered the ELK stack end to end and built log-forwarding pipelines into client-side QRadar SIEM; configured Azure Monitor alerting.
- Drove BCP/DR, RPO/RTO, backup and recovery, modernisation and production-readiness initiatives.
- Managed project plans, RAID/RAG tracking, dependencies, escalations, CAB/RFC, go-live and hypercare.
- Mentored engineers and introduced AI-assisted engineering using LLM APIs, prompt guardrails and AI security controls.

Manager | Ausha Digital Pvt. Ltd., Mumbai | Apr 2025 – Sept 2025

Led technical delivery for fintech applications across architecture, cloud, security, database performance and production reliability.

- Planned and executed migration of the full application estate from a hosting provider to AWS, covering infrastructure setup, application and database migration, validation, cutover and post-migration stabilisation
- Lifted AWS infrastructure availability from 82% to 99% through EC2/RDS optimisation, IAM hardening, firewall rules and monitoring
- Led InfoSec and audit-readiness programmes for banking and vendor environments, covering RBI/ISO-aligned controls, VAPT remediation coordination, security hardening and compliance sign-off
- Optimised MySQL workloads across 40M+ rows, cutting reporting and data-fetch times from minutes to seconds

- Implemented AWS SNS-based alerting and managed the ELK stack for centralised logging and operational visibility
- Designed a Python-based lead-partner matching solution and contributed to a Go-based real-time lead-scoring engine
- Led engineering teams across Spoctree, Chqbank, Telegati and other products, covering architecture, APIs, code reviews, delivery planning, budgeting and resource allocation

Calibehr Business Support Services Pvt. Ltd., Navi Mumbai

Technical Lead (Promoted) | Mar 2023 – Apr 2025

- Owned architecture and delivery for enterprise applications across multi-tier and microservices designs
- Managed AWS infrastructure end to end: migrated websites and applications to AWS, configured VPC and security groups, owned cost planning and optimisation, and led cloud and code security
- Contributed to system design and solution architecture discussions, with final approval resting with engineering management
- Built Jenkins and Docker CI/CD pipelines that cut deployment time by 40%, integrating Git/Bitbucket, SonarQube, automated testing and deployment controls
- Set up the ELK stack from scratch for centralised logging and monitoring across enterprise applications
- Led system design and delivery for a mission-critical aviation authority platform, owning stack decisions, algorithm design and high-volume navigation-data processing
- Architected and delivered COUS SaaS and CDSL InW, driving automation, scalable workflows and enterprise adoption
- Product Owner for COUS and MyBranch360, owning roadmap, backlog, sprint prioritisation, releases and stakeholder coordination
- Led LDAP integrations, API design, database optimisation, technical debt reduction and release governance
- Mentored developers across architecture, DevOps, security and code reviews

Senior PHP Developer | Mar 2022 – Mar 2023

- Started working across AWS and DevOps alongside development, covering infrastructure management, deployments and environment configuration
- Built enterprise and fintech applications using PHP, Laravel, Angular, MySQL and REST APIs on microservices and service-layer architecture
- Contributed to EARC, LMS, DEQC, Calibon CRM and the aviation authority platform, including Go-based backend development
- Re-architected DEQC database design and queries for high-volume workloads, improving data-processing performance
- Gathered technical requirements and ensured delivery aligned to them
- Worked on application security and InfoSec

PHP Developer & Webmaster | **Mega Lifesciences Ltd., Thane** | **Nov 2020 – Mar 2022**

- Solely owned and managed the company's AWS environment, covering infrastructure design, solution decisions, Ubuntu server management, Apache/Nginx configuration, deployments, monitoring and production support
- Reduced infrastructure cost by approximately 5% through capacity and cost optimisation
- Owned the SSL/TLS certificate lifecycle, including creation, deployment, renewal and private-key handling
- Improved application and website performance by approximately 20% through infrastructure tuning and technical optimisation
- Coordinated outsourced development teams and stakeholders across multiple countries, owning requirements, delivery and the application lifecycle through to production support
- Built and maintained enterprise web applications on PHP, MySQL, JavaScript and Linux

Web Developer | **Gametion Technologies, Navi Mumbai** | **Sept 2019 – Nov 2020**

- Built a custom HRMS application that automated leave and annual attendance, replacing manual workflows and reducing HR effort
- Developed the Cricket King API using PHP and MongoDB, supporting real-time game-data handling and application integration
- Worked across backend and API development, debugging and database operations
- Mentored developers on code quality, troubleshooting and delivery practices

Jr PHP Developer | **Calibehr Business Support Services Pvt. Ltd., Navi Mumbai** | **Jan 2017 – Sept 2019**

- Built enterprise applications including Mitra, Connect Intranet and employee onboarding platforms using PHP, CodeIgniter, Laravel, MySQL, JavaScript, Angular and REST APIs on Linux.
- Automated branch and employee workflows, reducing manual effort and improving onboarding turnaround.
- Worked across backend development, database design, API integrations, MVC architecture, deployment and production support.
- Moved into service-based and microservices-oriented development in the later part of the role.

Co-Founder | **Custh Solution Navi Mumbai** | **Jan 2014 – Sept 2017**

INDEPENDENT PROJECTS

Smart PDF Audio Reader | **Android Application**

Independent Developer | Live on Google Play | Technologies: Flutter, PDF Processing, TTS | Play Store: [View Application](#)

- Independently designed, developed, tested, and published an Android application using Flutter, owning requirements, architecture, development, QA, privacy, and production release.
- Built PDF processing, text-to-speech, background playback, playback-state management, and offline-first capabilities.
- Used Claude Code and Gemini extensively for AI-assisted development, debugging, refactoring, testing, documentation, and architecture improvements.

Hermes Agentic AI Workflow | Personal Automation Project

- Designed agentic workflows using Hermes for coding, technical analysis, Gmail processing, and operational automation.
- Developed reusable system prompts, workflow rules, prompt guardrails, PII-handling controls, and AI output validation practices.
- Used Claude Code, Gemini, and Hermes for AI-assisted coding, debugging, architecture analysis, automation, and engineering productivity.

AWARDS & RECOGNITION

- Best Employee of the Year — Calibehr, 2022
- Best Employee of the Month — Calibehr, February 2024
- Promoted from Senior PHP Developer to Technical Lead based on technical delivery, leadership, and performance.

EDUCATION

- **MBA (Data Science) – Manipal University** | In Progress, Expected Dec 2026
- **Bachelor of Science in Information Technology (B.Sc. IT)** – 2014
- **Higher Secondary Certificate (HSC)** – 2011
- **Secondary School Certificate (SSC)** – 2009

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Foundations of Cybersecurity** — Google — [View Certificate](#)
- **Managing Linux Systems** — LearnQuest — [View Certificate](#)
- **AWS Cloud Technical Essentials** — AWS — [View Certificate](#)
- **Migrating to the AWS Cloud** — AWS — [View Certificate](#)
- **Architecting Solutions on AWS** — AWS — [View Certificate](#)
